

# Raul Diaz's Resume

(909)684-3548 | rds92x@gmail.com | 16039 Katherine St Fontana CA 92335 | raul92x.github.io

## Education

San Bernardino, CA      Cal State University of San Bernardino      [2010-2016]

- B.S in Computer Science, June 2016

## Related Courses Taken

Programming Languages	Web Development	Computer Science I & II
Software Engineering	Data Structures	Algorithm Analysis
Server Programming		

## Technical Experience

### Projects:

- Website(2017):
  - Worked with HTML, CSS, and jQuery to create personal website.
  - Wrote code in Sublime code editor and would upload it using Git.
  - Wrote some code to make the website as mobile friendly as I can
  - Created a section where it can take you to another page where I implemented other features to show more of what I learned to implement a website.
- Android Mobile App(2016):
  - Implemented a login/register feature
  - Used a combination of Android Studio and a cloud9 environment.
  - PHP and MySQL was used for the back end of the app, to store the user login info.

## Work Experience

Product put-away (Nissan / Kelly Services - May 2019 to August 2019)

- Helped setup warehouse before facility opened as it was a new warehouse.
- Trained and certified to use scissor lifts to labels racks as they were being built.
- Once facility opened, used RF scanners to scan incoming product and physically placed it into barcoded shelve locations.
- Prior to placing the product into a shelf location, visually inspected each item for damage.
- Made sure that all product was in its proper location.
- Reported to management, when location was filled and out of space for the incoming product.
- Trained in various departments such as picking, where I would pick orders using a RF scanner.
- Packaged, labeled, and sorted product to be processed for distribution
- Properly packaged orders right by using proper materials for certain product.
- Helped in other areas or others, once my task assigned would be completed.

## Inventory Control / Quality Control (Calego / Precise Personnel - May 2018 to April 2019)

### Inventory Control

- Helped set up warehouse when the facility transferred from another city
- Made sure all inventory coming in was correct as indicated
- Responsible for daily cycle counts and inventory checks ensuring all SKUs were properly accounted for and documented
- Recorded data manually or using computer with Excel spreadsheet that was created by clerk
- Made sure all numbers were up to date and correct to fulfill daily orders
- Analyzed and resolved inventory control problems
- Reported all low quantities of SKUs to corporate to ensure more product was ordered
- Kept the highest demanded SKU always at a high stock amount
- Added any returns back to inventory to ensure everything was accounted for

### Quality Control

- Examined and inspected items for wear or defects reporting any damage to supervisor
- Monitored product packaging and made sure items were properly secured and packed
- Restructured and conducted pallet inspections to prevent all wrapped boxes from being damaged and freight inside
- Inspected product labels prior to use or storage
- Ensure the correct products and packaging was being used in accordance with the current work order.
- When denesting or nesting products, assured it was the correct item as in purchase order and made sure it was packaged securely with the right foam.

## Skills and Technologies

- Experienced mostly with C++; HTML; CSS
- Familiar with PHP; MySQL; jQuery; JavaScript
- Introduced to Java; ReactJS; Sass;
- Android Studio
- **Certificates:** Google Analytics for Beginners (April 2019 - April 2022)
